

CARING FOR YOUR HABAGAT BACKPACKS & HABAGAT PRODUCTS

Because of the constant evolution of material and technologies, always check the care instructions written on the label.

Habagat Packs / Products

There are several factors that dictate how to clean your Habagat pack / products, including the material to be cleaned, the apparatus to be used, and type of dirt.

- Always remember to remove the metal frame for the IF's (internal frames).
- Use a dry brush to brush off loose dirt due to mud.
- As needed, wipe out dirt from the inside to the outside with a damp sponge (not dripping wet) with clean water.
- Use a mild soap.
- Rinse only if possible.
- Use cold water and a sponge or rinse in a tub without soap.
- Do not soak in soapy water, it may cause delamination.
- Do not use detergents as many detergents with additives leave "surfactants" behind on a fabric's fibers that inhibit the technical performance. The term detergent is sometimes used to refer to any surfactant. If you really want to use soap for hard to remove stains and bad odors, please rinse thoroughly to diminish soap residue.
- To care for zippers and locks, always keep loose threads trimmed
- Hang the pack to air dry.
- DO NOT use a dryer as this will destroy water and wind repellent qualities.
- Store Habagat packs / products in a cool and dry place when not in use.

Habagat T-shirts

New Habagat apparel products feel stiff. Don't worry; they soften after the first wash. Our apparel is machine washable, use gentle cycle with like colors. Please use cold water, do not use bleach and wash inside out. Tumble dry low or dry naturally. Do not iron on print or if necessary, warm iron inside out.

Habagat Sleeping Bags

To make sure your Habagat sleeping bag stays in top condition when machine-washing, wrap it in a sheet or better still, put in a sleeping bag sheet. Hang to air dry.
