S10 plus&special (Summer and Travel Supplement)

Summer time is vacation time – day trips to the beach, weekend getaways for young professionals, and long vacations with the family. And while one is planning for one's own vacation getaway, Habagat Outdoor Equipment is coming out with a practical solution to make packing your stuff less of a chore, and the least of your worries!

Newest line

Habagat introduces the Aqua Series – the newest line of bags and packs suitable for your summer adventures and waters sports fun. The Aqua Series is composed of two packs – The Pacifico Duffle Bag and the Tsunami Day Pack.

These packs are designed and manufactured to be suitable for tropical beach use, for the rigors of water sports, and making carrying and packing your stuff easy and worry-free.

The Pacifico Duffle Bag is ideal for storing wet clothes and gear, while featuring useful pocket compartments to store your gadgets and keys. It is a medium-sized rubber mesh duffle bag that's ideal for outings at the beach and for aquatic sports.

Generally, people just pick out the next bag that's handy when packing for the beach and just pack everything in – and worry about mixing wet and dry clothes and gear later. The Pacifico Duffle Bag makes bringing home your wet clothes easy and manageable. Gone are the days when you worry about ruining your bag and spoiling your clothes because of improper ventilation.

The Pacifico Duffle Bag takes this worry away because the main compartment is made from durable rubber mesh and pack cloth. This means that you have less to worry about ruining your bag and taking out wet clothes that smell funky after being stashed inside for quite some time.

The Pacifico Duffle Bag makes visibility and ventilation inside the bag easy because of the rubber mesh panel design. Incorporated into the Pacifico's innovative design are drain holes at the bottom of the bag, to let any excess water seeping out from your wet clothes, to drip out of the bag.

Easy carrying and usage

To have easy access on the smaller but similarly important stuff, the Pacifico features two internal end pockets and an external zippered pocket. The Pacifico Duffle Pack is fitted with YKK Vislon zippers and sliders designed specifically to prevent corrosion, an adjustable sling strap and grab handle set for easy carrying and usage – perfect applications of an outdoor adventure equipment to summer and water sports use.

Tsunami

The second pack in Habagat's Aqua Series is the Tsunami Day Pack. The Tsunami Day Pack has the standard day pack features, while innovating features that make it resistant and resilient in wet conditions and constant use.

This day pack features the corrosion-free YKK Vislon zippers and sliders and the same rubber mesh panel for visibility and ventilation of gear and clothes. The Tsunami also has the internal open and zippered mesh pockets, an external front zippered pocket for easy storage and access.

The Tsunami also has a composite mesh shoulder strap (with padding) for comfort; a padded back panel; a waist strap for stable load-bearing; a haul loop; and a mesh pocket (with a bungee cord stopper) that can carry items up to the size of a 1-liter Nalgene bottle, on both sides.

The Aqua Series will be launched on April 2009 at the Habagat SM Cebu Shop and soon to flood the Authorized Outlets and Dealers nationwide. To know more about the Aqua series, and other innovations in outdoor equipment, check out Habagat Outdoor Equipment at www.habagat.com
